420A Race Manifold

Become acquainted with the SymTech Labs' 420A Race Manifold. Eclipses, Talons, Avengers and Sebrings equipped with the 420A engine will no longer be relegated to using antiquated, poor performing log-style manifolds. SymTech Labs, in conjunction

with one of its very close partners, is preparing to launch the 420A Race Manifold by May 2008. Pricing is still tentative, but will be very reasonable in comparison to welded stainless steel manifolds.

- Original design
- High quality cast steel is resistant to cracking
- T3-style main flange
- 38mm style wastegate flange
- Cast EGT probe bung
- Fits up to the Garrett GT35R
- Supports 3"+ downpipes w/ wide radius bends
- CAD Designed and CFD Tested
